3D MOUNTAIN
Crafted in the Alps

ASSEMBLY INSTRUCTIONS

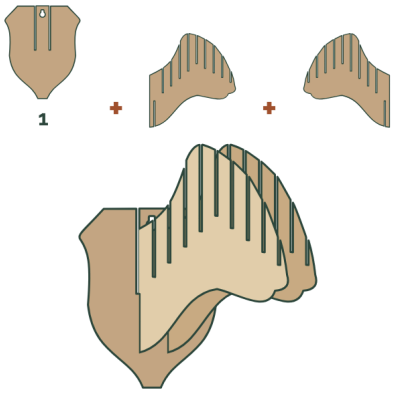

How to assemble your rabbit head

No glue, no tools: the pieces simply slot together.

3 mm plywood · laser cut | About 15 minutes | Ages 14+ | Made in France

1 The base and the two profile pieces

Take the base (piece no. 1), then insert the two profile pieces (the only two without a number) into its slots, at right angles to the base.

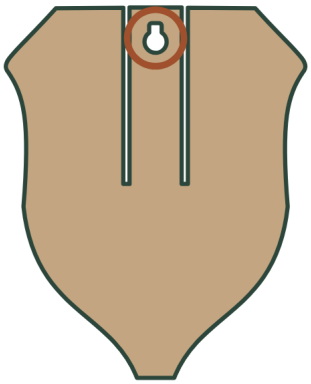

2 The numbered pieces

Then slot in the remaining pieces in numerical order, starting with no. 2, **from back to front**.

3 Hanging

Hang your rabbit on a nail or a screw using the keyhole-shaped hanging slot (circled opposite).

And here's the finished result!

Make it your own: the wood can be painted directly (wood stain, paint or paper decoupage).

Wood. A story. A one-of-a-kind piece.

Cut in our workshop
in Bourg-d'Oisans (French Alps)
